Starter shapes

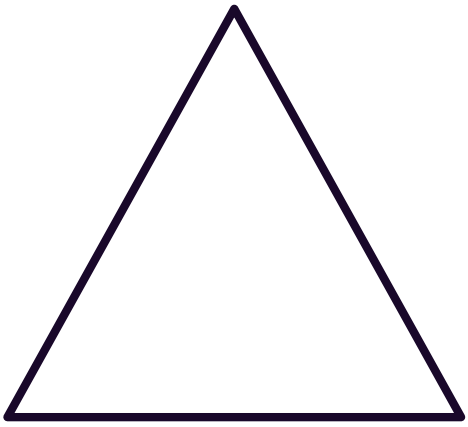

Lay a transparent sheet or your silicone mat over the page and trace each outline slowly with the pen. Go round each shape twice for a stronger outline, then fill it with a zig-zag if you want a solid piece.

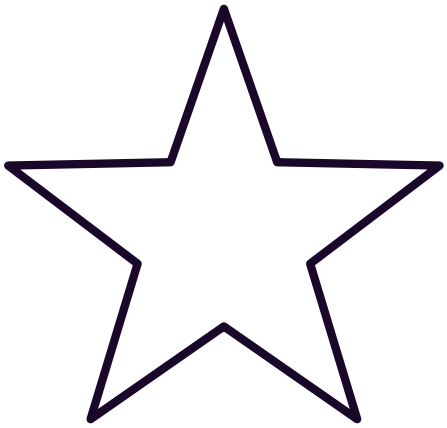

Circle

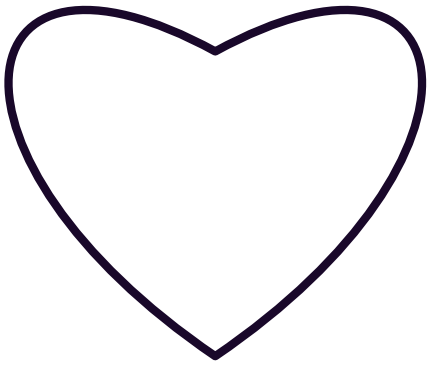

Square

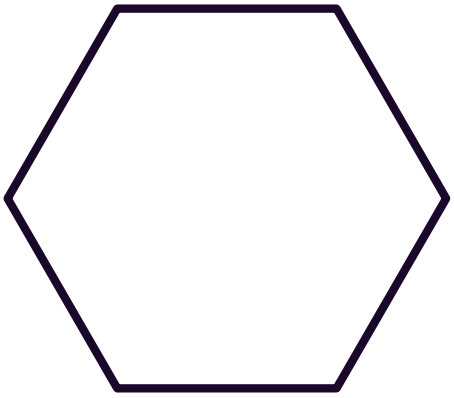

Triangle

Star

Heart

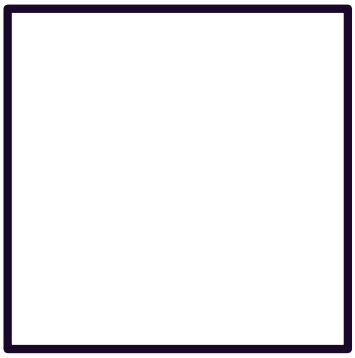

Hexagon

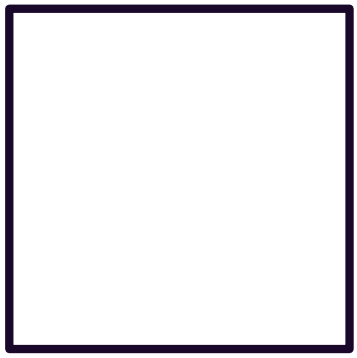

Free to print for personal and classroom use

Cube and pyramid

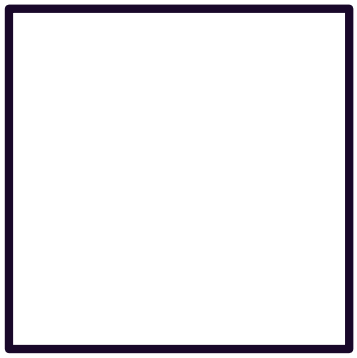

Draw each face flat, let it cool, then peel it off. Hold two faces at a right angle and run a line of plastic along the joint to weld them. Build the cube from six faces; the pyramid from one square base and four triangles.

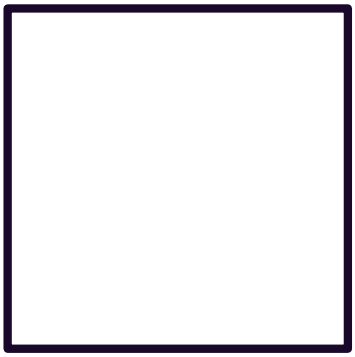

Cube face 1

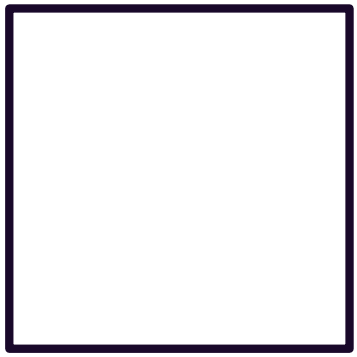

Cube face 2

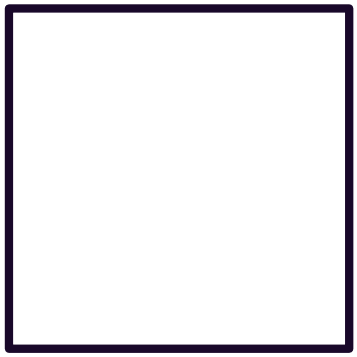

Cube face 3

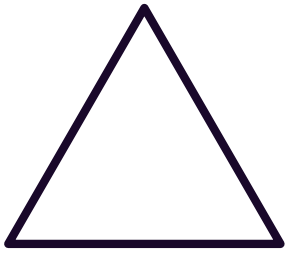

Cube face 4

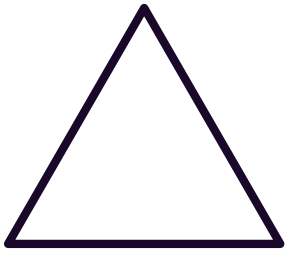

Cube face 5

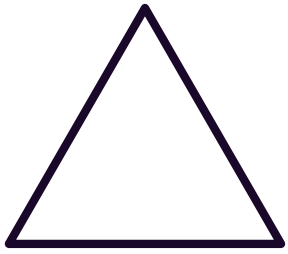

Cube face 6

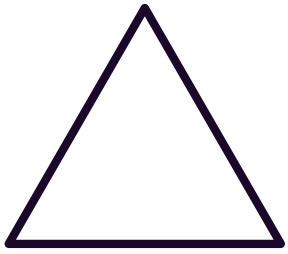

Pyramid side 1

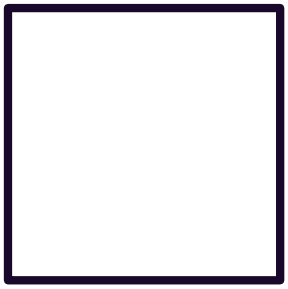

Pyramid side 2

Pyramid side 3

Pyramid side 4

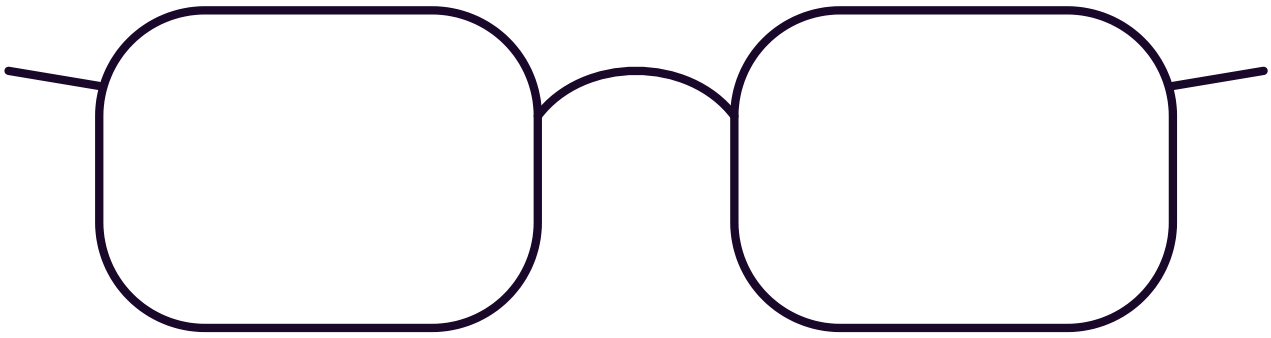

Pyramid base

3D glasses

Trace the front frame and both arms. When cool, weld each arm to the outer edge of the frame with a short line of plastic, angled back. These are a craft piece for fun, not real eyewear: they don't protect your eyes.

Front frame (draw this as one piece)

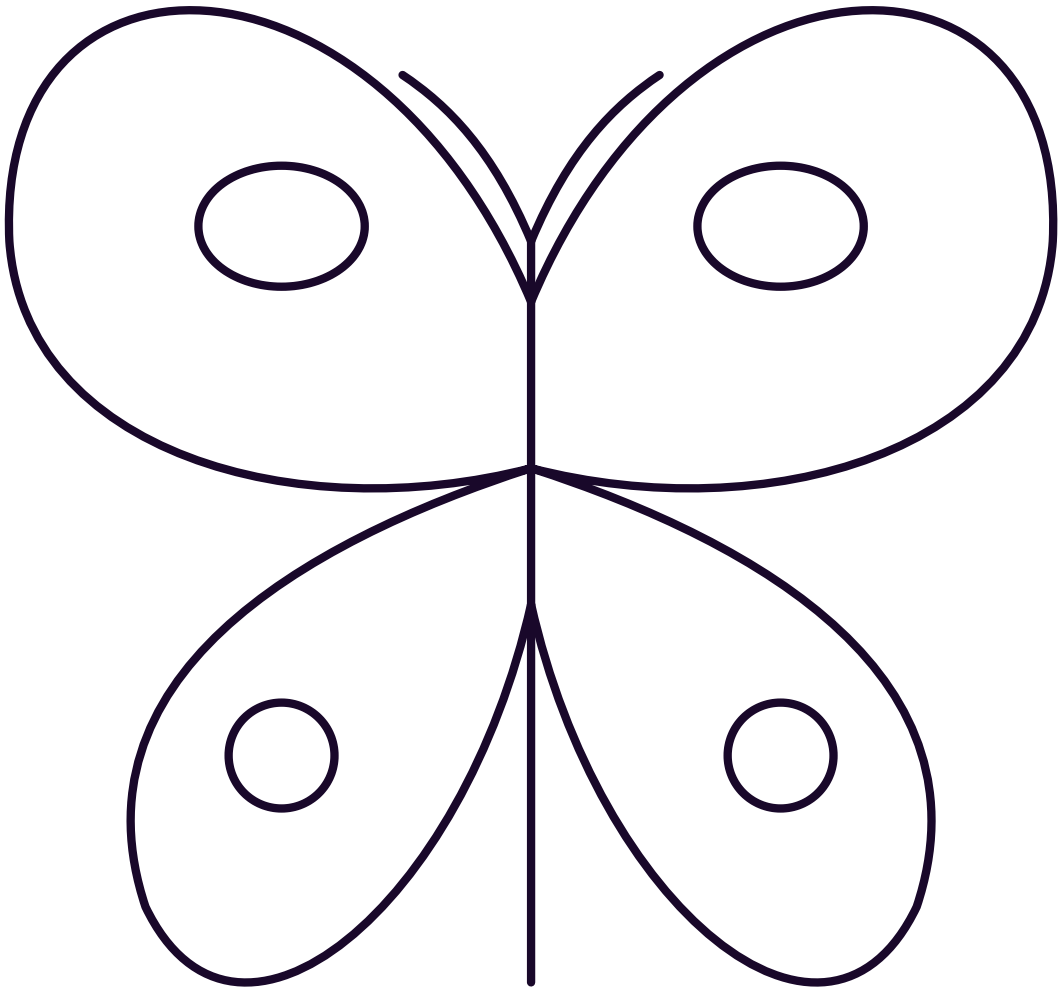

Two arms (draw both)

Free to print for personal and classroom use

Butterfly

Trace the outline first, then the inner patterns. For a 3D butterfly, draw the two wings as separate pieces and weld them to the body at an angle so they stand up.

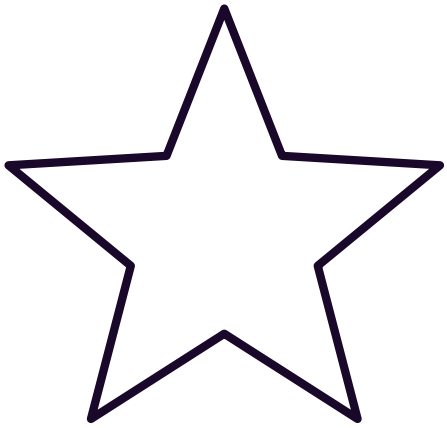

Draw the wing outlines and patterns, then the body down the middle

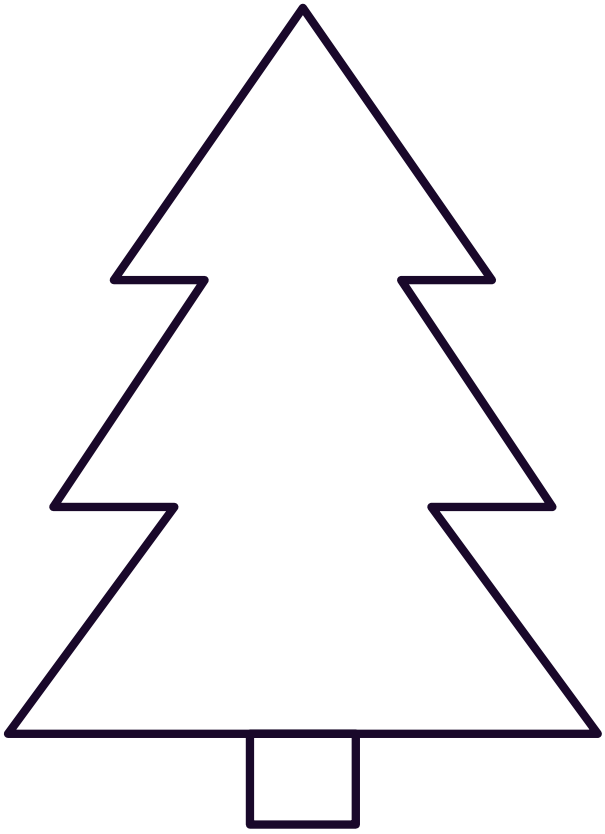

Free to print for personal and classroom use

Christmas decorations

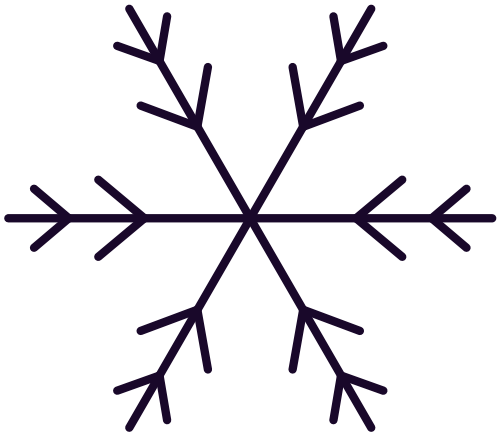

Trace each decoration, then add a small loop of plastic at the top for a ribbon. For a standing tree, draw two trees and weld them together at right angles along the centre line.

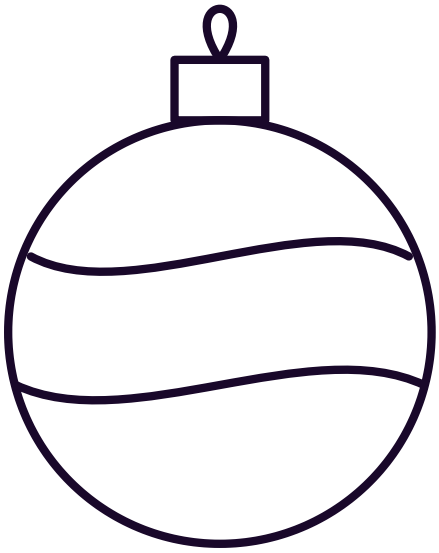

Star

Tree

Snowflake

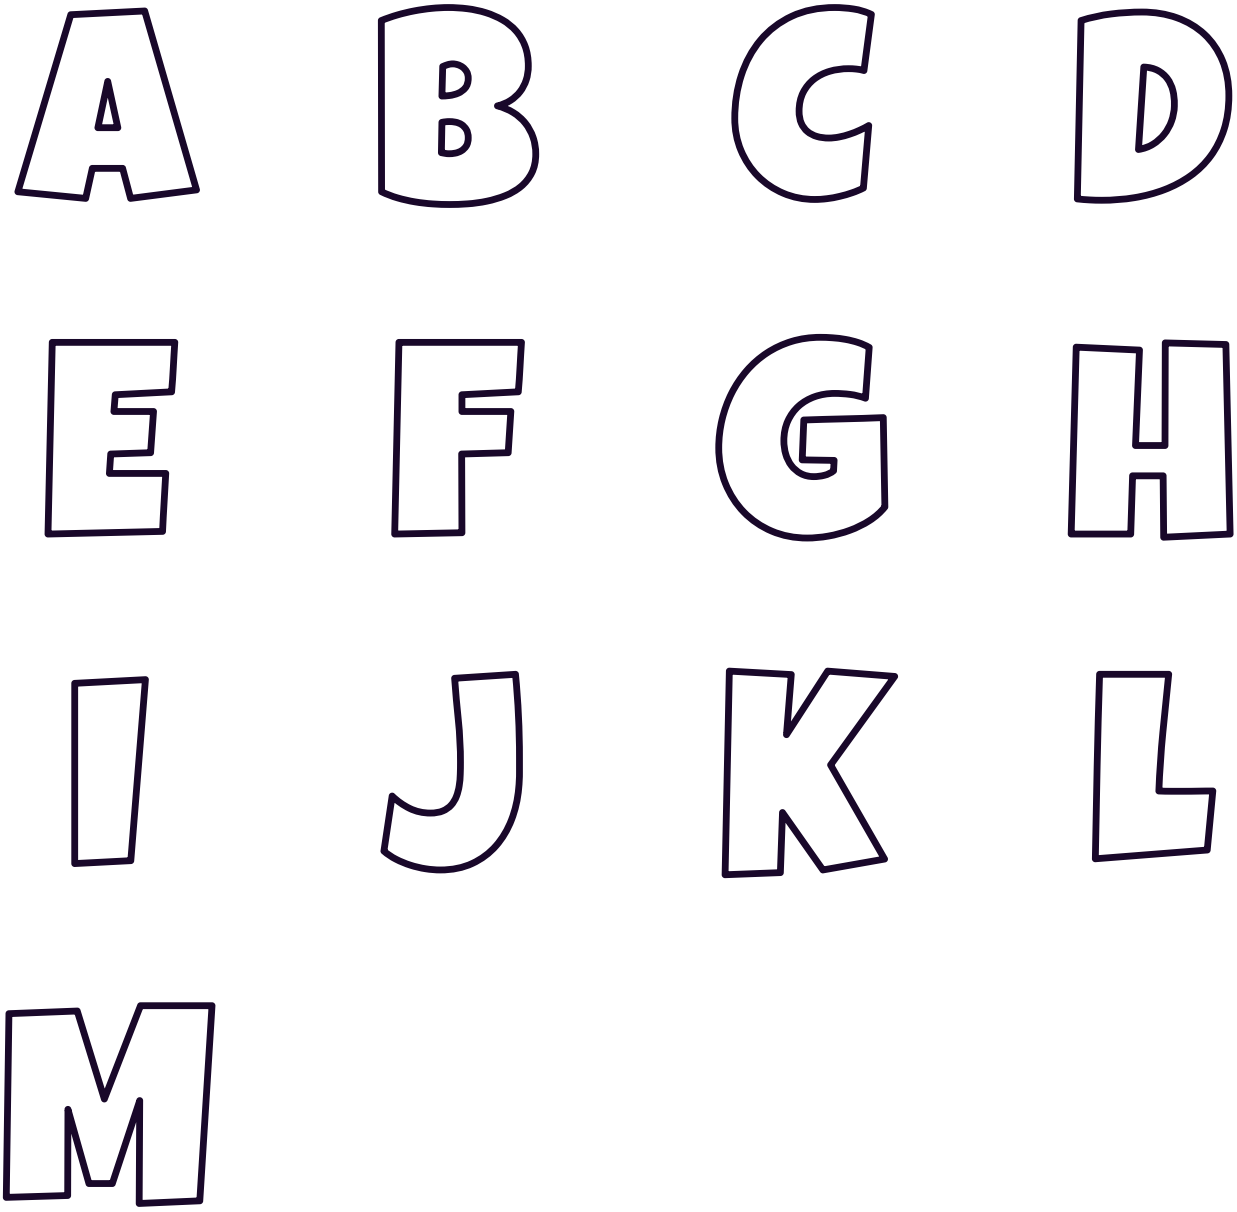

Bauble

Alphabet: A to M

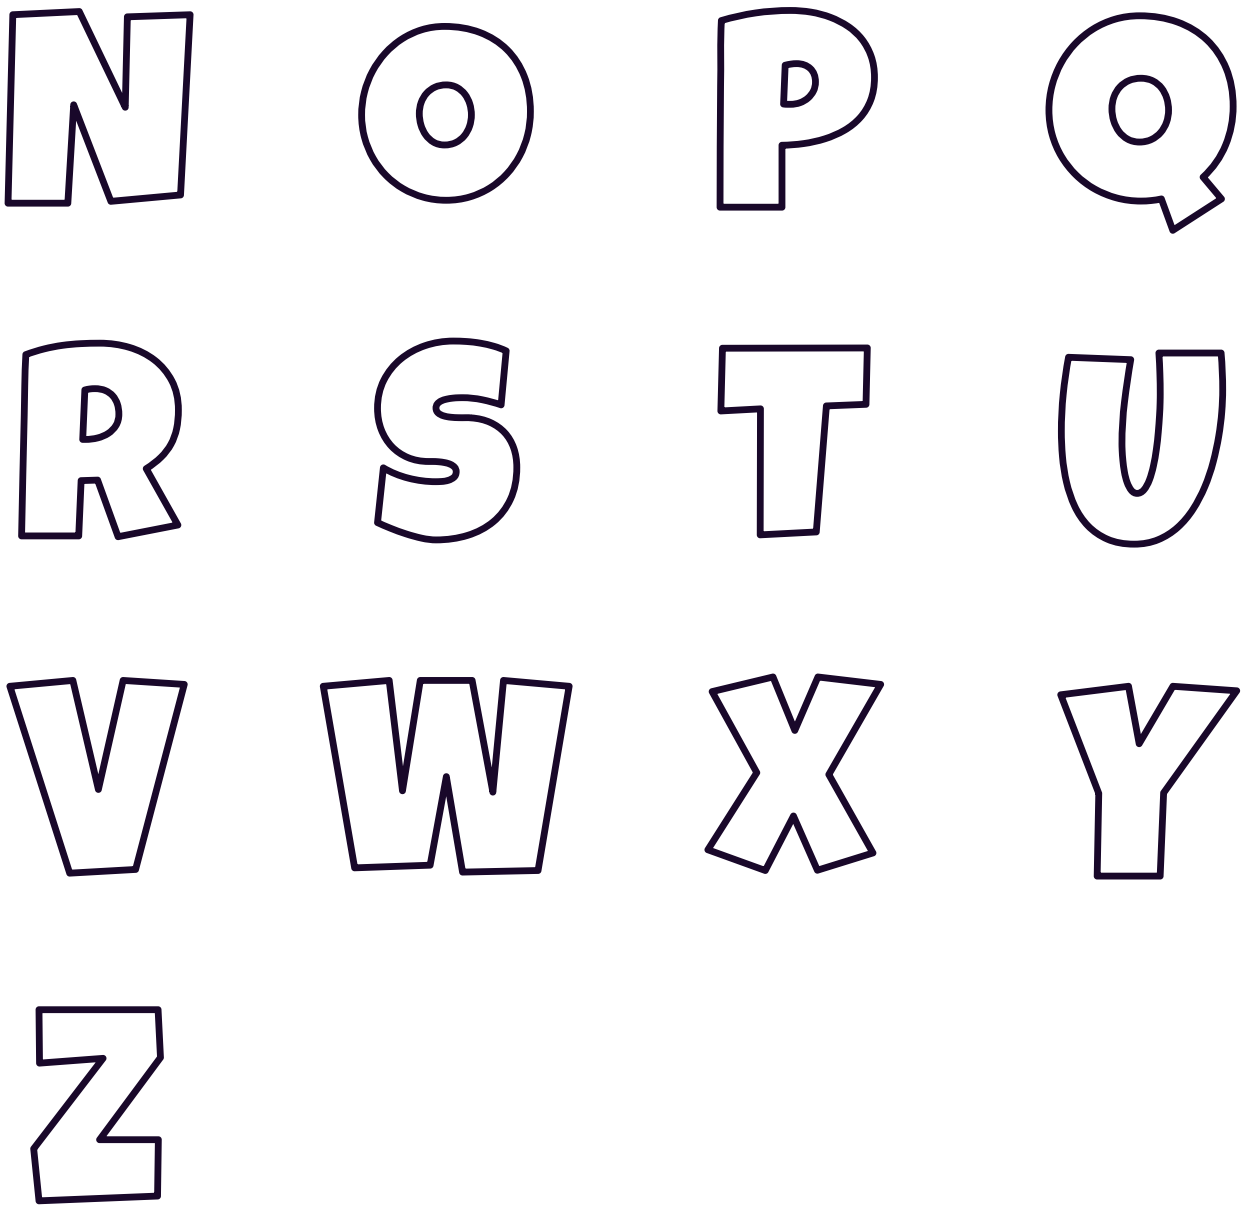

Trace the outline of each letter, then fill it with close lines. Letters stay flat, so they work well on a silicone mat or a transparent sheet; spell a name and join the letters with a bar along the bottom.

Free to print for personal and classroom use

Alphabet: N to Z

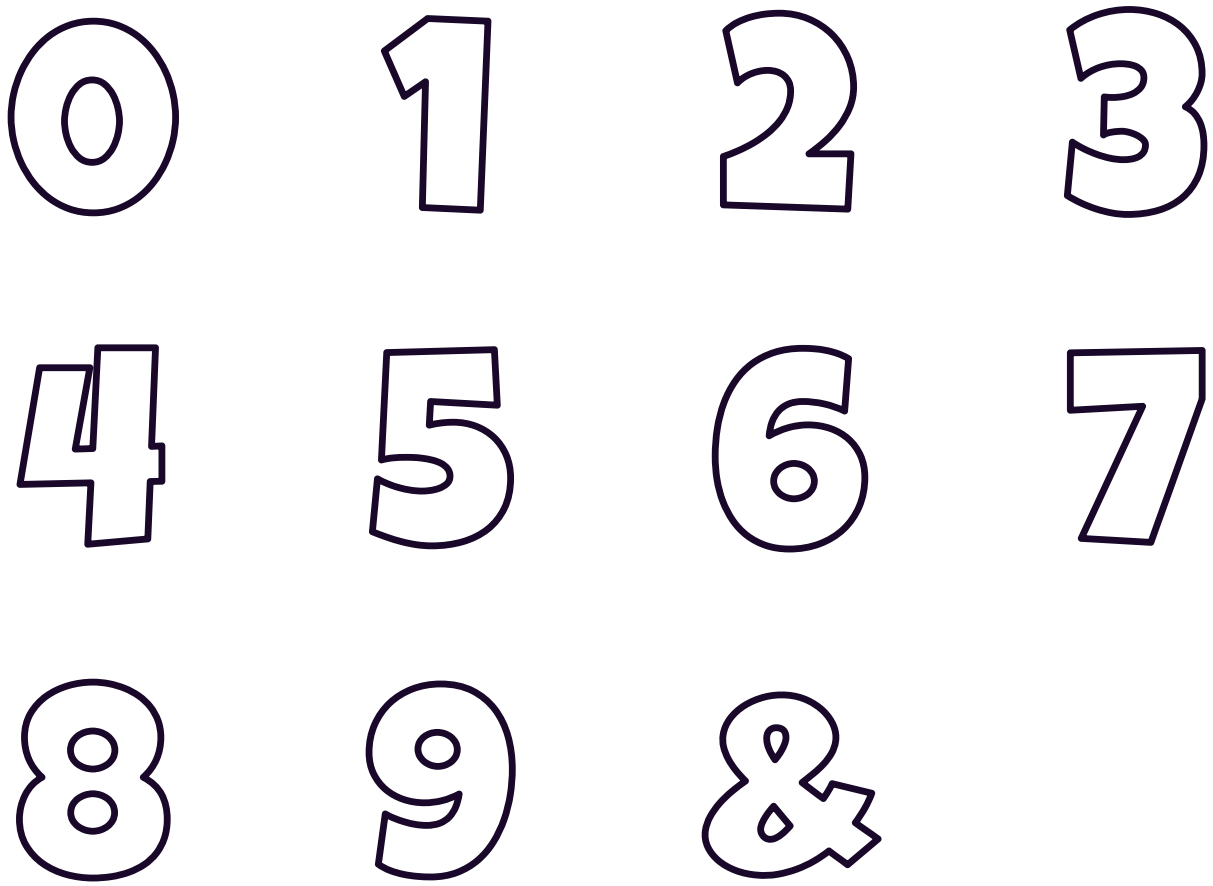

Trace the outline of each letter, then fill it with close lines. To make a keyring, add a loop at the top of the first letter.

Free to print for personal and classroom use

Numbers 0 to 9

Trace the outline of each number, then fill it. Use them for birthday cards, signs and room decorations. Keep pen plastic away from food.
